

Response to Intervention Pretest/Posttest

Mark each statement with a “T” for True and an “F” for False.

	Pretest	Posttest	True or False
1.			The recommended instructional time for reading is sixty minutes?
2.			The principal plays an integral role in the success of RtI implementation into the school culture.
3.			All students are assessed at least 3 times a year in reading, math and behavior. This is not universal screening.
4.			DIBELS, AIMSweb and 4Sight are examples of tools used for Universal Screening.
5.			Grade level teams should meet to discuss universal screening data within 3 weeks of the assessment.
6.			Grade level teams set goals for Tier 2 and Tier 3.
7.			Universal screening must be sensitive to small increments of change.
8.			It will take 3 – 6 years for a school / district to fully implement the RtI model with fidelity.
9.			Adequate uninterrupted instructional time for math is 60 minutes.

10.			The principal is responsible for organizing and facilitating data meetings.
11.			Fidelity checklists should be used to monitor the implementation of core and supplemental curriculums as well as evidence based strategies and interventions.
12.			Universal screening is a brief procedure designed as a last resort for identifying children at high risk for academic failure.
13.			Tier 2 interventions occur at least twice a week for 30 minutes.
14.			Approximately 80% of students are successful in the core curriculum.
15.			It is not necessary for universal screening instruments to be reliable and valid.
